Education

Arizona State University

Master of Science in Software Engineering

Aug 2024 – May 2026

Phoenix, AZ

Savitribai Phule Pune University

Bachelor of Engineering in Computer Engineering

Aug 2019 – May 2023

8.96 CGPA

Relevant Coursework

- Data Structures
- Algorithms Analysis
- Computer Networks
- Systems Programming
- Object Oriented Prog.
- Database Management
- Software Security
- Operating Systems

Technical Skills

Languages: C, C++, Java, Python, HTML, CSS, JavaScript

Frontend & Backend: ReactJS, ExpressJS, NodeJS

DevOps Tools: Docker, Kubernetes, Jenkins, Git, GitHub, Linux

Databases: MongoDB, SQL(MySQL, Oracle)

Experience

Veritas Technologies LLC

Associate IT Application Specialist

July 2023 – Aug 2024

Pune, India

- Developed and maintained React JS web applications for the company's product suite, using Redux for state management and React Router for navigation, improving user experience, scalability, and performance.
- Integrated front-end components with backend services using RESTful APIs built with Node.js and Express, ensuring efficient data communication and server-side functionality.
- Managed server infrastructure and deployed applications, ensuring optimal uptime and performance across environments. Utilized Linux for server management, performing system monitoring, updates, and troubleshooting.
- Collaborated with cross-functional teams to maintain apps, ensuring smooth operation & resolving technical issues.

Veritas Technologies LLC

IT Intern

Jan 2023 – July 2023

Pune, India

- Contributed to the development of the Database Central Repository (DCR) an application among top 10 projects within the org, centralizing databases, servers, and application-related data.
- Designed and implemented custom dashboards to provide real-time insights on database and server performance.
- Managed databases including Oracle and MS SQL Server, ensuring data consistency and optimizing performance.

Eluminous Technologies

React Developer Intern

Feb 2022 – May 2022

Nashik, India

- Developed and maintained web applications using React, enhancing user interfaces for better performance & scalability.
- Debugged and resolved bugs in existing applications, ensuring smooth functionality and improving user experience.
- Utilized modern React technologies like hooks, context API, and state management libraries to optimize development workflows.

Projects

Travel Path - ItineraryPlanner | *ReactJS, JavaScript, FastAPI, GraphDB, SPARQL* | (View)

- Developed a scalable web application using **ReactJS** for the front-end, **Firebase** for real-time updates, and **FastAPI** for backend microservices, enabling seamless itinerary planning.
- Integrated semantic knowledge graphs and **SPARQL** queries with **GraphDB**, leveraging GNIS-LD datasets to deliver personalized, context-aware travel itineraries tailored to user preferences.
- Implemented real-time communication between the front-end and backend using a Uvicorn orchestrator and socket communication, enabling on-the-go itinerary adjustments and enhancing adaptable travel planning.

GoText - Messenger | *ReactJS, Firebase, JavaScript, Material UI*

- Developed a React based messenger featuring Google Authentication for secure user access and real-time messaging capabilities.
- Implemented a robust messaging system where messages are stored in Firebase Firestore with proper timestamps and unique IDs, ensuring organized and efficient data management.

Leadership / Extracurricular

Association of Computer Engineering

Technical Secretary

Mar 2022 – Jun 2022

ADYPSOE, Pune
